Hiring Manager & Engineering Leadership
Ai2 / Allen Institute for AI

RE: Application for Senior Software Engineer Role

Dear Hiring Team at Ai2 / Allen Institute for AI,

I am excited to apply for the Senior Software Engineer (Associate / Mid-Level) role at Ai2 / Allen Institute for AI. My experience in CI/CD security automation, backend performance optimization, and cloud migrations directly aligns with your mission to build robust infrastructure for impactful agents.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support Ai2 / Allen Institute for AI's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
