Hiring Manager & Engineering Leadership
Canonical Ltd.

RE: Application for Distributed Systems Testing Software Engineer, Python / Go Role

Dear Hiring Team at Canonical Ltd.,

I am excited to apply for the Distributed Systems Testing Software Engineer, Python / Go position at Canonical Ltd. My experience in CI/CD automation, cloud security, and distributed systems performance, including Kubernetes, GitHub Actions, Azure, and AWS, aligns perfectly with your team's mission.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support Canonical Ltd.'s upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
