Hiring Manager & Engineering Leadership
Canonical Ltd.

RE: Application for Software Engineer - Secure Container Images Role

Dear Hiring Team at Canonical Ltd.,

I am a DevSecOps & Backend Engineer with a strong passion for secure container images and CI/CD automation. My experience includes reducing security triage time by 60% with OWASP ZAP/Trivy and optimizing API latency by 83%, making me an ideal candidate for Canonical's Software Engineer - Secure Container Images role.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support Canonical Ltd.'s upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
