Hiring Manager & Engineering Leadership
Choco

RE: Application for Senior Software Engineer, Platform Role

Dear Hiring Team at Choco,

I am excited to apply for the Senior Software Engineer, Platform role at Choco. My experience in CI/CD security automation, backend performance optimization, and cloud migrations aligns perfectly with your team's focus on scalability and reliability.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support Choco's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
