Hiring Manager & Engineering Leadership
Orbit Technologies

RE: Application for Fullstack Engineer Role

Dear Hiring Team at Orbit Technologies,

I am writing to express my strong enthusiasm for the Fullstack Engineer position at Orbit Technologies. With hands-on experience in DevSecOps automation, microservice architecture, and AI tool integration, I am confident in my ability to bring immediate technical value to your engineering organization.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support Orbit Technologies's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
