Hiring Manager & Engineering Leadership
PolicyMe

RE: Application for Software Engineer Role

Dear Hiring Team at PolicyMe,

I am excited to apply for the Software Engineer position at PolicyMe. My background in Python, AWS, backend optimization (83% latency reduction), and AI-driven projects aligns perfectly with your mission to build an AI-powered product line.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support PolicyMe's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
