Hiring Manager & Engineering Leadership Radical Numerics

RE: Application for San Francisco, CA; Tokyo, JP Role

Dear Hiring Team at Radical Numerics,

I am excited to apply for the Associate/Mid-Level position at Radical Numerics. My experience in DevSecOps, backend optimization, and cloud migrations, including a 60% reduction in security triage time and an 83% reduction in API latency, directly aligns with your mission to scale AI infrastructure.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support Radical Numerics's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
