Hiring Manager & Engineering Leadership
Ruby Labs

RE: Application for Senior iOS Engineer Role

Dear Hiring Team at Ruby Labs,

I am a Junior/Mid-level DevSecOps & Backend Engineer with strong CI/CD and GitHub Actions experience, and familiarity with Go, interested in the Senior iOS Engineer role at Ruby Labs.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support Ruby Labs's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
