Hiring Manager & Engineering Leadership
TechCorp Berlin

RE: Application for DevSecOps Engineer Role

Dear Hiring Team at TechCorp Berlin,

I am thrilled to apply for the DevSecOps Engineer role at TechCorp Berlin. Having automated security pipelines with Trivy, SonarQube, and OWASP ZAP across Azure and GitLab CI/CD, I am confident in elevating your platform security posture.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support TechCorp Berlin's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
