Hiring Manager & Engineering Leadership
TripleTen

RE: Application for AI Systems Engineering Expert Role

Dear Hiring Team at TripleTen,

I am a highly motivated Junior/Mid-Level DevSecOps & Backend Engineer with proven experience in CI/CD security automation, performance optimization, and cloud migrations, eager to contribute my skills to TripleTen.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support TripleTen's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
