## **RE: Application for Salesforce Developer Role**

Dear Hiring Team at dentsu,

While my primary experience is in DevSecOps and Backend Engineering, I am a highly motivated and adaptable engineer with a strong understanding of DevOps/Agile principles and SDLC, eager to transition my skills into Salesforce development at dentsu.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support dentsu's upcoming milestones. Thank you for your time and consideration.

Sincerely,

**Ghaith Oueslati**

DevSecOps & Backend Engineer
