Hiring Manager / Recruitment Team
CloudBase Amsterdam

RE: Application for Backend Engineer (Node.js / NestJS) Role

Dear Hiring Manager,

I am excited to apply for the Backend Engineer position at CloudBase Amsterdam. My background developing scalable NestJS microservices and optimizing MongoDB/Redis caching will allow me to deliver immediate value to your backend platform.

During my time at SeekMake, I successfully reduced security triage time by 60% by integrating Google Gemini API into our CI/CD pipeline to analyze OWASP ZAP and Trivy findings, and reduced backend API latency by 83% via MongoDB aggregation optimization. Additionally, I contributed to migrating 38+ CI/CD workflows to GitLab CI/CD and migrating 8 microservices to Azure Container Apps.

I would welcome the opportunity to discuss how my background in backend engineering, cloud infrastructure, and security automation aligns with CloudBase Amsterdam's goals. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
