Hiring Manager / Recruitment Team
FinTech London

RE: Application for Platform Engineer Role

Dear Hiring Manager,

I am writing to apply for the Platform Engineer role at FinTech London. My experience maintaining Kubernetes clusters, writing Terraform modules, and building resilient GitLab CI/CD pipelines aligns closely with your needs.

During my time at SeekMake, I successfully reduced security triage time by 60% by integrating Google Gemini API into our CI/CD pipeline to analyze OWASP ZAP and Trivy findings, and reduced backend API latency by 83% via MongoDB aggregation optimization. Additionally, I contributed to migrating 38+ CI/CD workflows to GitLab CI/CD and migrating 8 microservices to Azure Container Apps.

I would welcome the opportunity to discuss how my background in backend engineering, cloud infrastructure, and security automation aligns with FinTech London's goals. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
