**Hiring Manager / Recruitment Team**  
**SRECloud Zurich**

## **RE: Application for Site Reliability Engineer Role**

Dear Hiring Manager,

I am excited to apply for the SRE position at SRECloud Zurich. My background in Kubernetes orchestration, CI/CD automation, and metric-driven monitoring with Grafana will ensure robust platform reliability.

During my time at SeekMake, I successfully reduced security triage time by 60% by integrating Google Gemini API into our CI/CD pipeline to analyze OWASP ZAP and Trivy findings, and reduced backend API latency by 83% via MongoDB aggregation optimization. Additionally, I contributed to migrating 38+ CI/CD workflows to GitLab CI/CD and migrating 8 microservices to Azure Container Apps.

I would welcome the opportunity to discuss how my background in backend engineering, cloud infrastructure, and security automation aligns with SRECloud Zurich's goals. Thank you for your time and consideration.

Sincerely,

**Ghaith Oueslati**

DevSecOps & Backend Engineer
