Hiring Manager / Recruitment Team
RemoteFirst Inc

RE: Application for Cloud Engineer (AWS/Azure) Role

Dear Hiring Manager,

I am pleased to submit my application for the Cloud Engineer role at RemoteFirst Inc. Having led migrations to Azure Container Apps and automated cloud deployments with Terraform, I am eager to help scale your cloud architecture.

During my time at SeekMake, I successfully reduced security triage time by 60% by integrating Google Gemini API into our CI/CD pipeline to analyze OWASP ZAP and Trivy findings, and reduced backend API latency by 83% via MongoDB aggregation optimization. Additionally, I contributed to migrating 38+ CI/CD workflows to GitLab CI/CD and migrating 8 microservices to Azure Container Apps.

I would welcome the opportunity to discuss how my background in backend engineering, cloud infrastructure, and security automation aligns with RemoteFirst Inc's goals. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
