PROFESSIONAL SUMMARY

Ghaith is a results-driven DevSecOps and backend engineer with a strong track record in building secure, high-performance cloud systems. His technical depth and automation capabilities make him a compelling candidate for remote engineering roles at scale-focused organizations like Germain Hotels.

ROLE-RELEVANT HIGHLIGHTS

- Cut security triage time by 60% by integrating Google Gemini API into CI/CD for OWASP ZAP & Trivy findings.
- Reduced backend API latency by 83% through MongoDB pipeline optimization and caching.
- Built AI-powered test generation agent (5,200+ lines) achieving 75%+ unit test coverage.

TECHNICAL SKILLS

DevOps & Cloud:	Docker, Terraform, GitHub Actions, GitLab CI/CD, AWS, EC2, Lambda, Secrets Manager, Azure, Azure Container Apps, Azure Front Door, Azure Container Registry, ACR, GCP, Cloud Run, Google Artifact Registry, GAR
Languages & DBs:	JavaScript, TypeScript, Python, Java, C#, C++, C, PL/SQL, SQL, MySQL, MongoDB, PostgreSQL
Frameworks & Tools:	React, Angular, Node.js, NestJS, Spring Boot, .NET, Flutter, Django, Laravel, Symfony, OWASP ZAP, Trivy, SonarQube, DevSecOps, SAST, DAST, SCA

PROFESSIONAL EXPERIENCE

SeekMake — DevSecOps & Backend Engineer (Jan 2026 – Present | Tunisia)

- Reduced manual security triage time by **60%** by integrating Google Gemini API into CI/CD to classify OWASP ZAP and Trivy findings.
- Reduced backend API response latency by **83%** by optimizing MongoDB aggregation pipelines and implementing caching.
- Engineered an AI-powered test generation agent (**5,200+ lines**) with Vertex AI, lifting unit test coverage to **75%+**.
- Migrated **38+ CI/CD workflows** from GitHub Actions to GitLab CI/CD with self-hosted runner infrastructure.
- Migrated 8 of 12 microservices from GCP Cloud Run to Azure Container Apps and configured Azure Front Door routing.

Cube IT — Mobile Developer Intern (Jun 2025 – Present | Tunisia)

- Improved travel time estimation accuracy by **15%** by integrating mapping APIs and routing logic in Flutter transport app.
- Built core booking and payment gateway features using Flutter and Spring Boot microservices.

Barmej Tech — Fullstack Developer Intern (Jun 2024 – Aug 2024 | Tunisia)

- Boosted backend performance by **30%** by optimizing SQL queries and caching core HR endpoints with JWT auth.

EDUCATION & LANGUAGES

ESPRIT — B.Eng. in Computer Engineering (TWIN: Web & Internet Technologies) (Graduating June 2026)

Languages: Arabic (Native) • French (Professional) • English (Professional) • Italian (B2 Certified)
