Hiring Manager & Engineering Leadership
FinTech London

RE: Application for Platform Engineer Role

Dear Hiring Team at FinTech London,

I am writing to apply for the Platform Engineer role at FinTech London. My experience maintaining Kubernetes clusters, writing Terraform modules, and building resilient GitLab CI/CD pipelines aligns closely with your needs.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support FinTech London's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
