Hiring Manager & Engineering Leadership
RemoteFirst Inc

RE: Application for Cloud Engineer (AWS/Azure) Role

Dear Hiring Team at RemoteFirst Inc,

I am pleased to submit my application for the Cloud Engineer role at RemoteFirst Inc. Having led migrations to Azure Container Apps and automated cloud deployments with Terraform, I am eager to help scale your cloud architecture.

Key technical achievements and relevant qualifications from my experience include:

- **CI/CD Security Automation:** Cut manual vulnerability triage time by **60%** by integrating Google Gemini API + Trivy and OWASP ZAP scanners directly into automated pipelines.
- **Backend Performance & Latency:** Reduced API response latency by **83%** through MongoDB aggregation pipeline optimization and multi-tier Redis caching.
- **Cloud & Container Orchestration:** Successfully migrated 38+ CI/CD workflows to GitLab CI/CD and migrated containerized microservices to Azure Container Apps and AWS.

I would welcome the opportunity to discuss how my technical expertise in cloud infrastructure, backend systems, and security automation can support RemoteFirst Inc's upcoming milestones. Thank you for your time and consideration.

Sincerely,

Ghaith Oueslati

DevSecOps & Backend Engineer
